IT solutions
and services*

StackFrame is a Central Florida based software developer and managed service provider, including web hosting, data backup, monitoring, systems integration, security, and expert technical support. We have earned a reputation for reliably delivering innovative and cutting-edge solutions to difficult problems. Whether on-site at your facility or from our data center, we are able to offer the most cost-effective IT solutions tailored to your company's needs.

✓ Hosting

Host your company's website, email, databases, and applications on our secure, private virtual servers managed and monitored by our technical staff 24/7. We utilize Xen virtualization technology to reduce costs and maximize flexibility, allowing for solutions perfectly sized to your needs. Our hosting infrastructure is housed in a state of the art data center with redundant gigabit Internet connections and power supplies ensuring availability.

✓ Backup

We provide an intelligent backup service using a variety of customized open source solutions in order to intelligently transfer large amounts of data. Our backup infrastructure is designed to avoid tape media technologies, making data search and retrieval convenient and efficient.

✓ Monitoring

We have developed a central monitoring system which integrates into customer sites and systems. This gives us situational awareness into availability of services and systems, security updates and alerts, and capacity issues, allowing us to proactively maintain customer infrastructure.

✓ Systems Integration

Modern IT environments are increasingly an integration challenge. Whether unifying a Linux and Windows environment or integrating disparate web applications, we have extensive experience with customizable, scalable, and reliable solutions that incorporate heterogeneous infrastructure and resources.

✓ Security

We are dedicated to keeping your data private and secure. We offer network perimeter security, risk analysis, and ongoing security infrastructure testing and evaluation.

Your data will be secured from any interruptions from viruses and spyware that could slow your business down.

✓ Expert Technical Support

Our 16 employees provide a diversity of expertise and a depth of experience to solve any problem. Our capabilities run the gamut from simple hardware installation to software development, making us an ideal single source for your IT needs.
